DETAILED ACTION

Response to Preliminary Amendment

1. As filed on 9/17/01 as Paper 2, Applicant's preliminary amendment has been acknowledged.

Response to Restriction/Election

2. As filed on 4/26/04 as Paper 4, Applicant elects without traverse, the distinct species I, which reads on claims 1-8.

The requirement is deemed proper and is therefore made FINAL.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the second summer must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 4-8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had

possession of the claimed invention. The claimed feature "a second summer for adding the predicted frame data and non-subsampled spatial domain data ... in the first video resolution." is not described and/or shown in the specification.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Boyce et al (5,614,952).

Regarding claim 1, Boyce et al discloses a system for processing MPEG data comprising:

a digital tuner (Fig. 4, 399) for receiving a data channel containing an MPEG coded data stream;

a decoding system including;

a frequency converter module (Fig. 1, 124) to transform frequency coefficients in the MPEG coded data stream to a spatial domain to obtain spatial domain data;

a subsampling module (126) for subsampling the spatial domain data by a selected factor to generate subsampled spatial domain data;

a motion vector (MV) module (130) disposed to receive MV and reference image data in the coded data stream, wherein the decoding system configured to process a reference frame and motion vectors of the MPEG data to generate predicted frame data;

a first summer (128) for adding the predicted frame data and the subsampled spatial domain data to generate first video images encoded in a reduced volume of video data.

Regarding claims 2-3, Boyce et al discloses coded data being decoded to produce images in a first video resolution (Fig. 4, 401) greater than a second video resolution (402, 403), and a display device (Fig. 4, TO DISPLAY to TV monitor) for displaying the video in the second video resolution, wherein the display device is coupled to the frame buffer (Fig. 1, 118) for displaying the first video images.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
